

what is **xy play** ?

xy play is an application created to accompany xy educational music toys. by teaching technique & theory through the playing of songs, kids of any age can start out learning the basics of music with an app that will continue to challenge and teach them for years.

made to be

- simple
- fun
- versatile
- accessible
- adaptable

playing is simple:

xy play listens for all of the correct notes to be played before moving on to the next note / lesson

the further you get in your lessons, the more songs you unlock in the song shop

versatility & accessibility

all xy hardware and software use a color-coded system of notes.
all xy products are designed with them attached, and with the use
of the provided stickers, any instrument can be used.

xy play also supports:

OSC

MIDI

USB MIDI

AUDIO

BLE

so you can play with existing devices

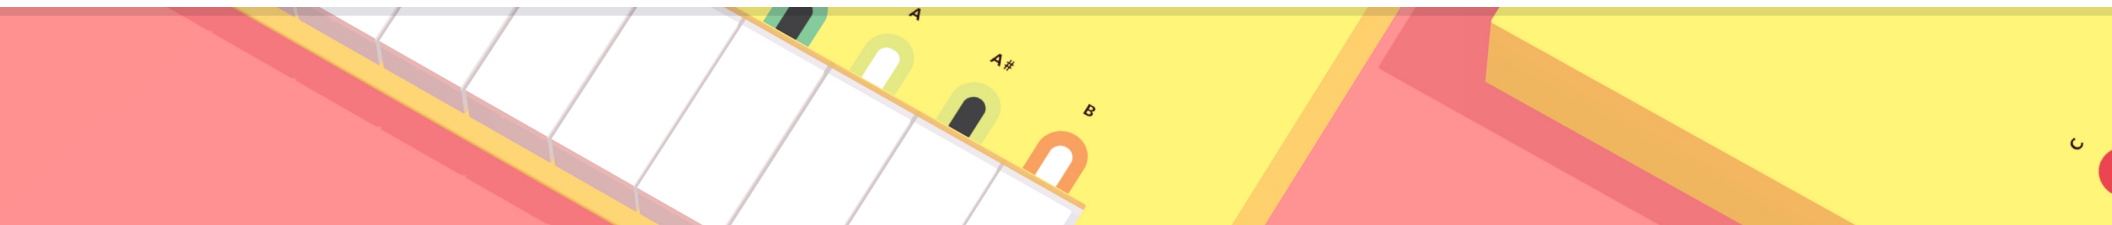

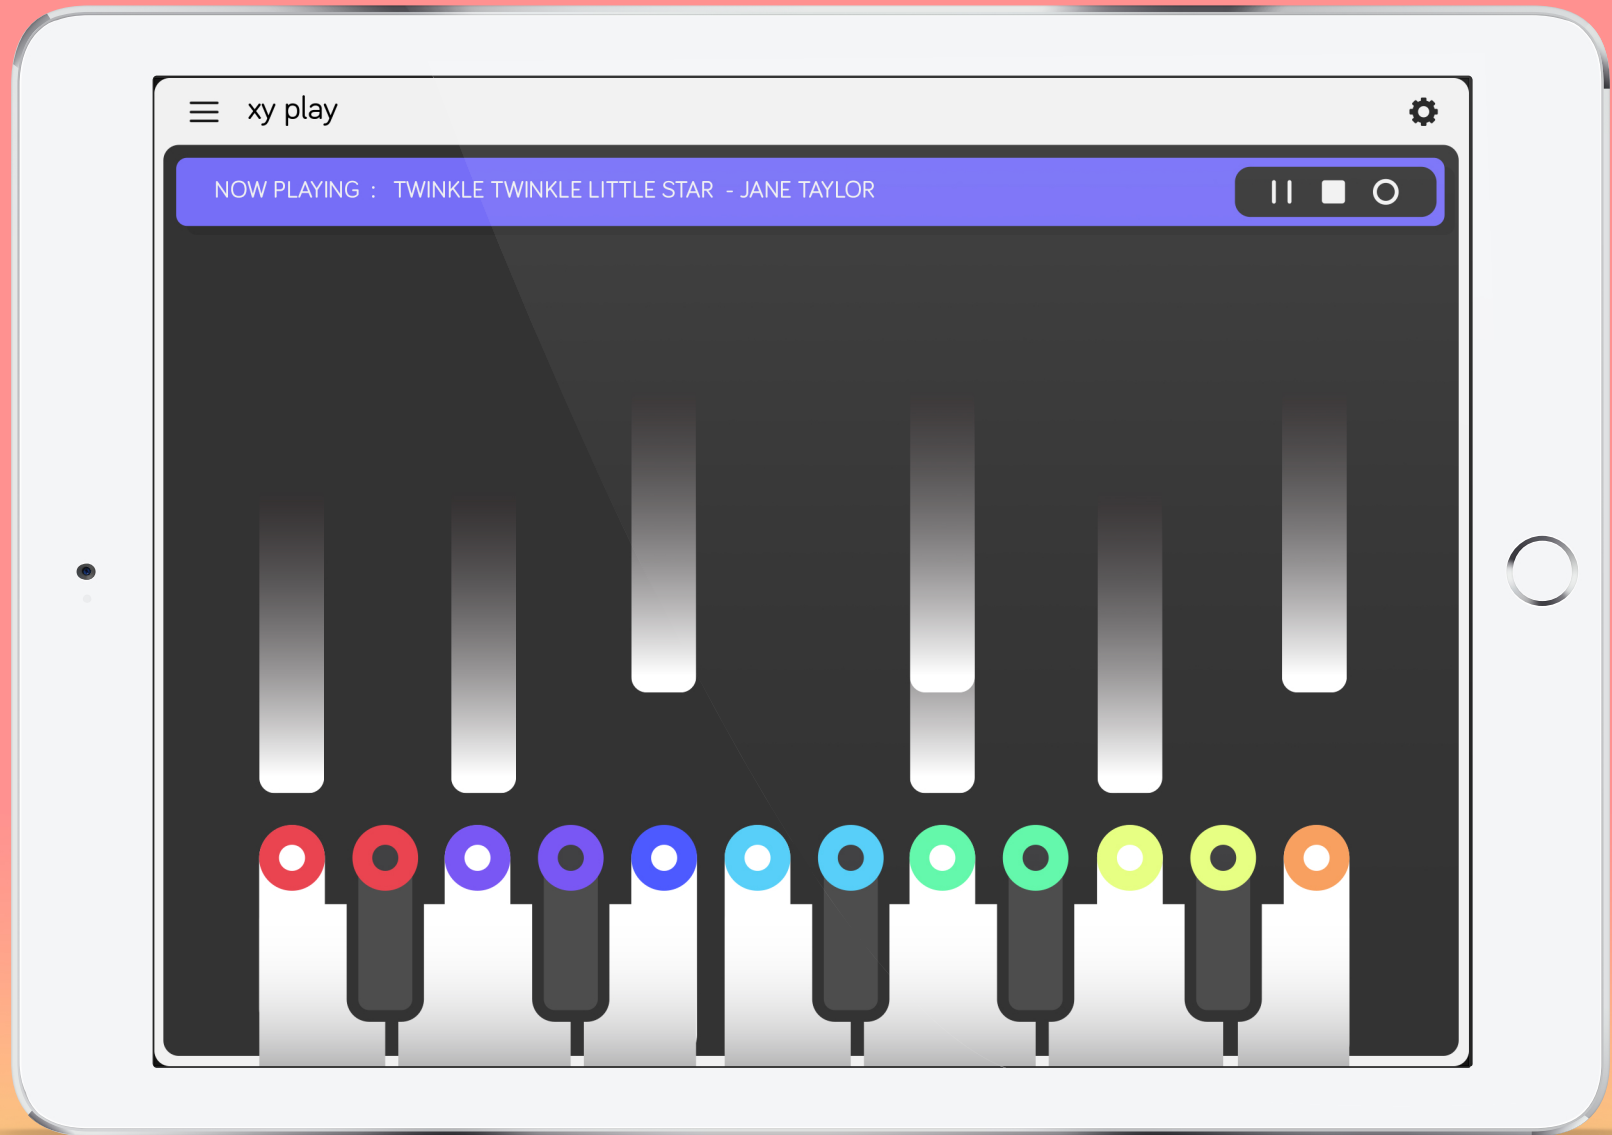

on top of everything else, xy is designed to be fun.

with challenges, high scores, and levels, xy play makes learning music as simple as playing a game. through the xy hub, you can even play songs with friends through the same speaker.

with songs separated into parts, it allows a song to be split between multiple players at once.

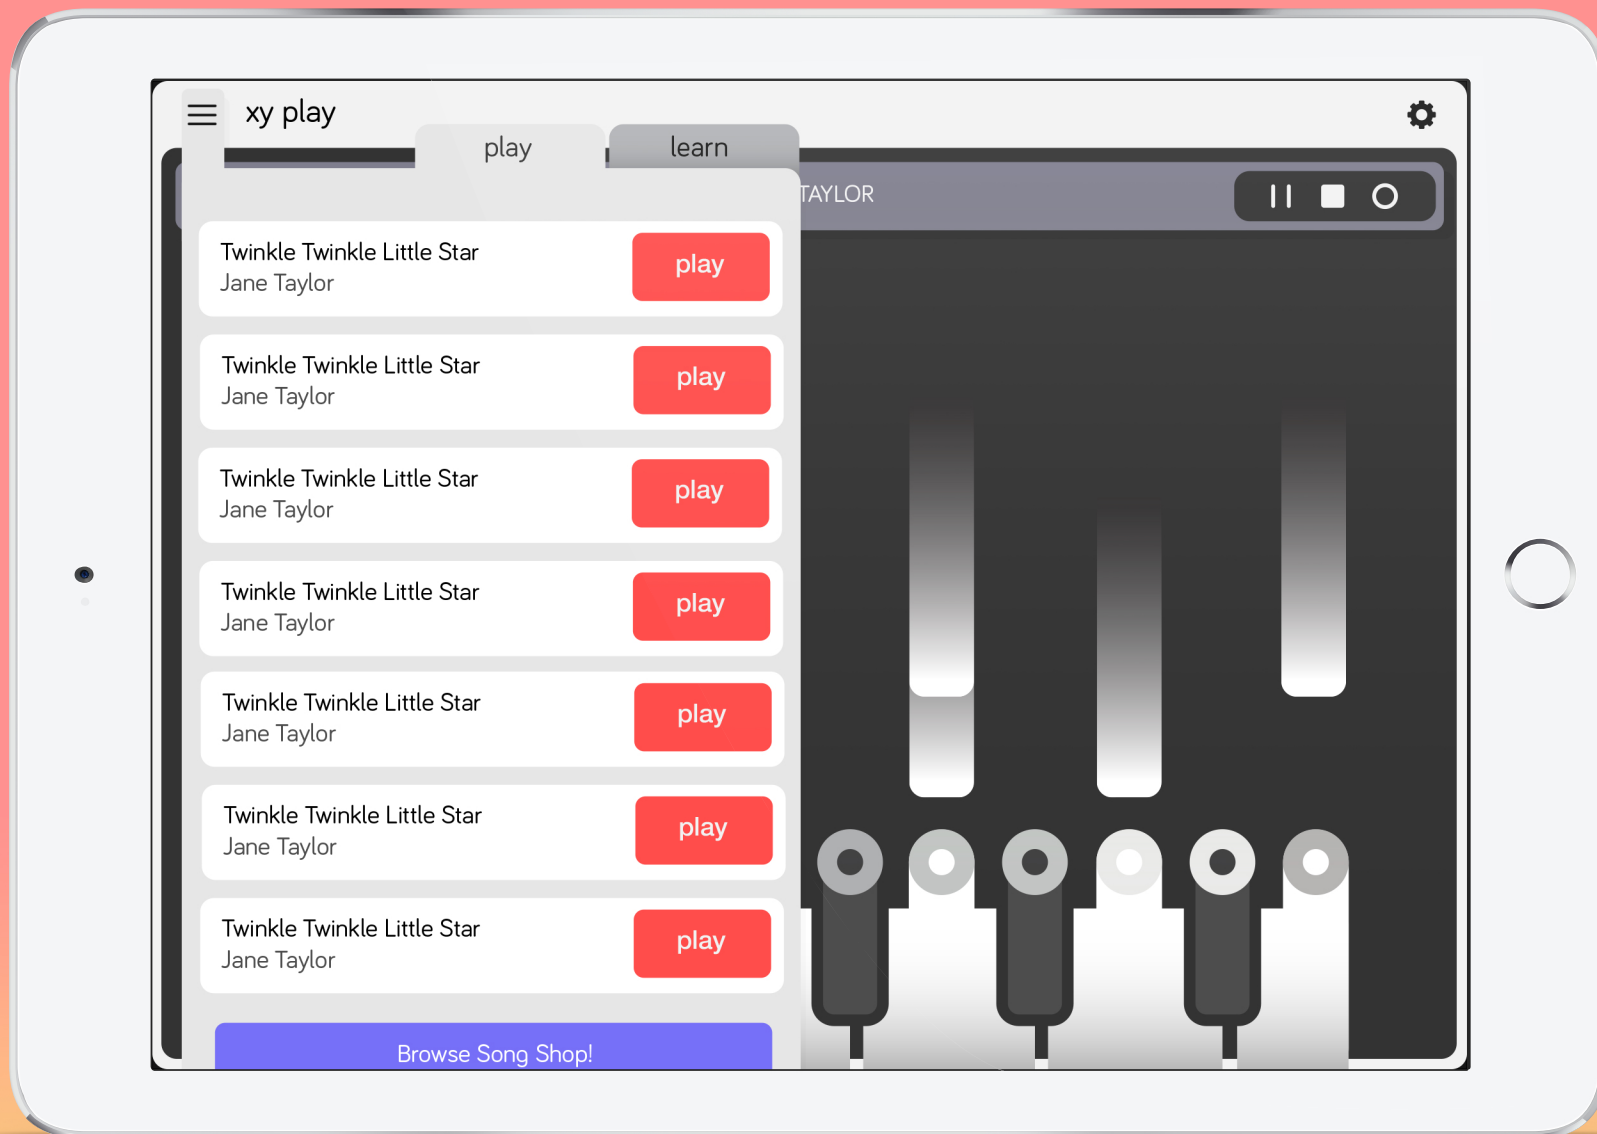

multiple instrument sounds can also be selected to play along with you, allowing harmonies, beats, and solos to play along with you.

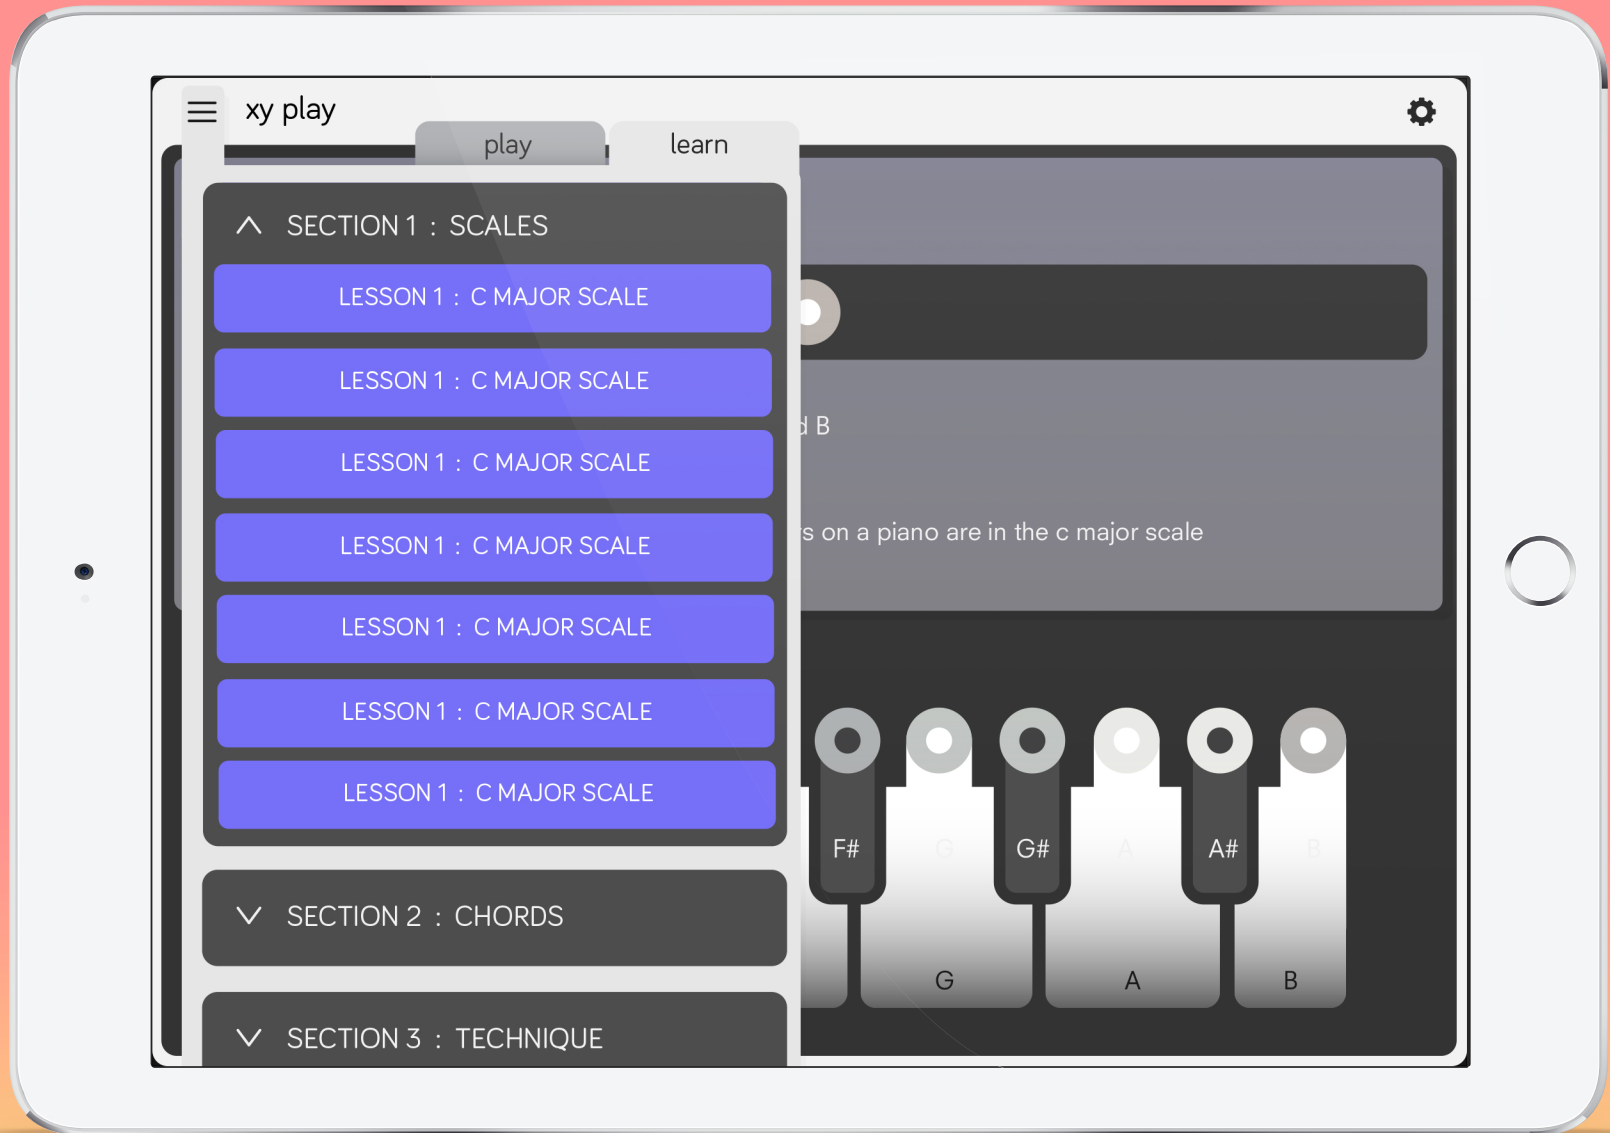

XY PLAY MAIN PAGE

the application opens to this page, allowing the player to get started immediately

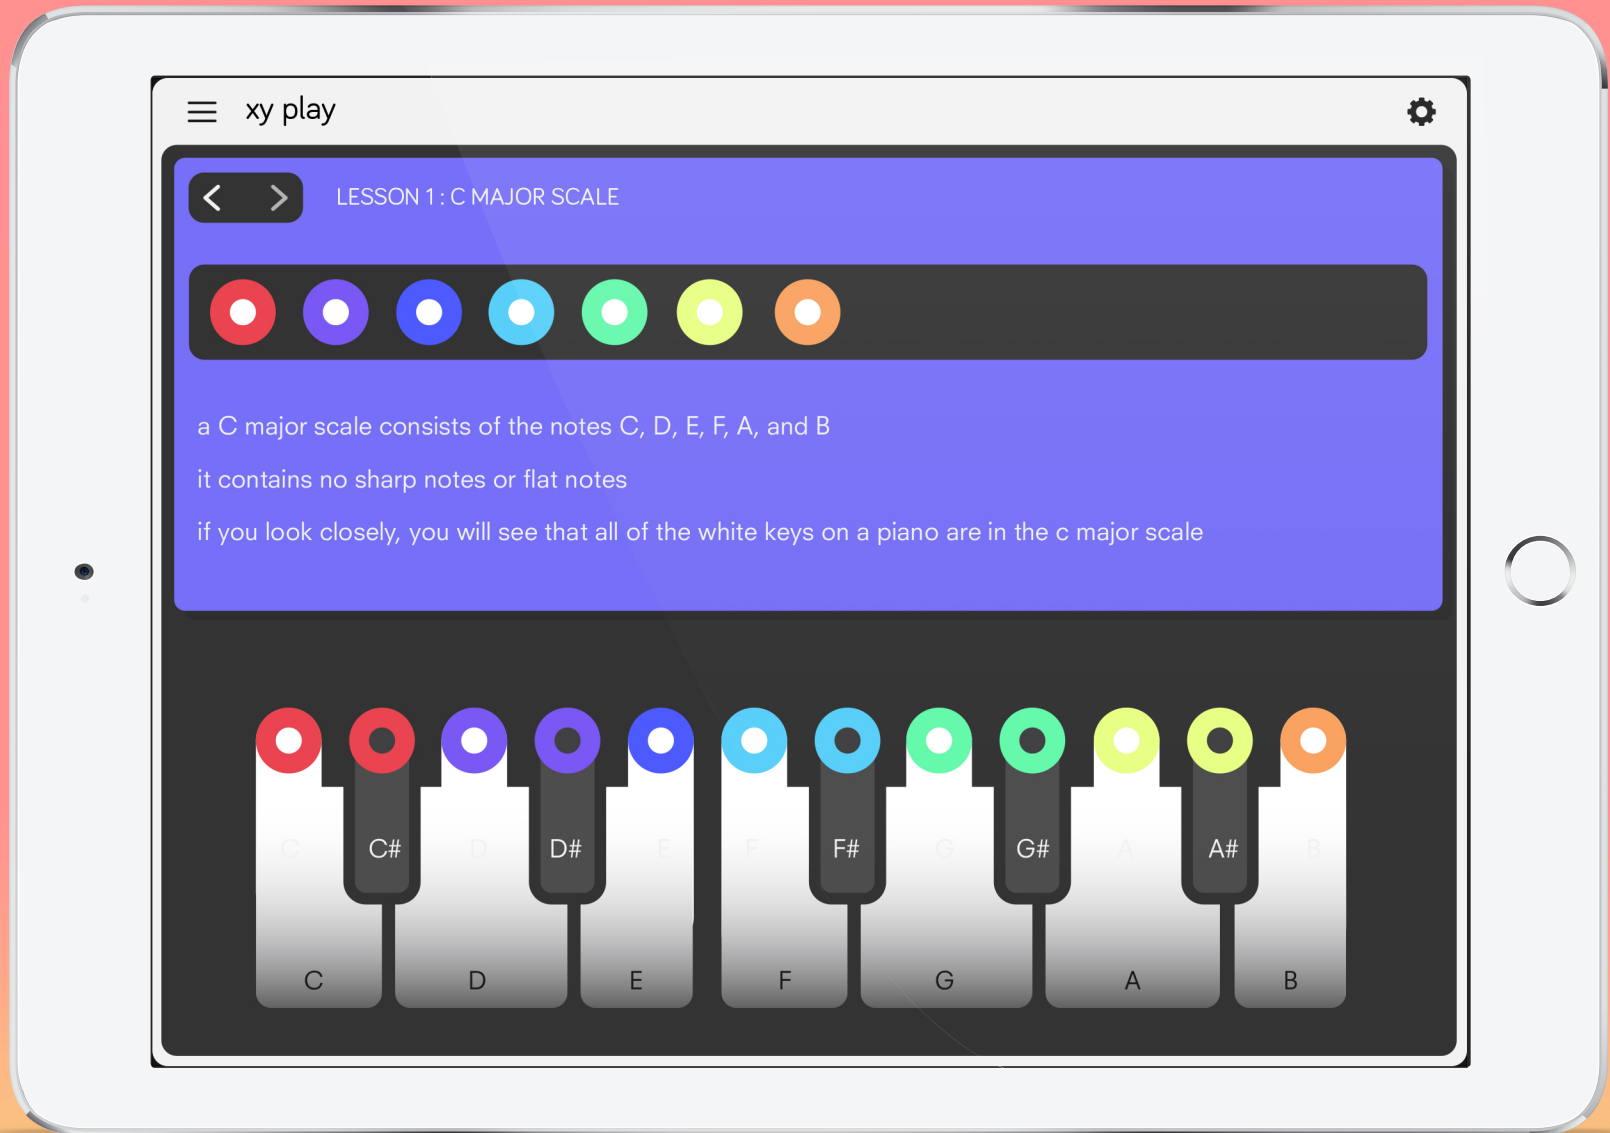

PLAY MENU

this menu, accessed via the menu button on the top left of the page, provides both song choices and access to the learn menu

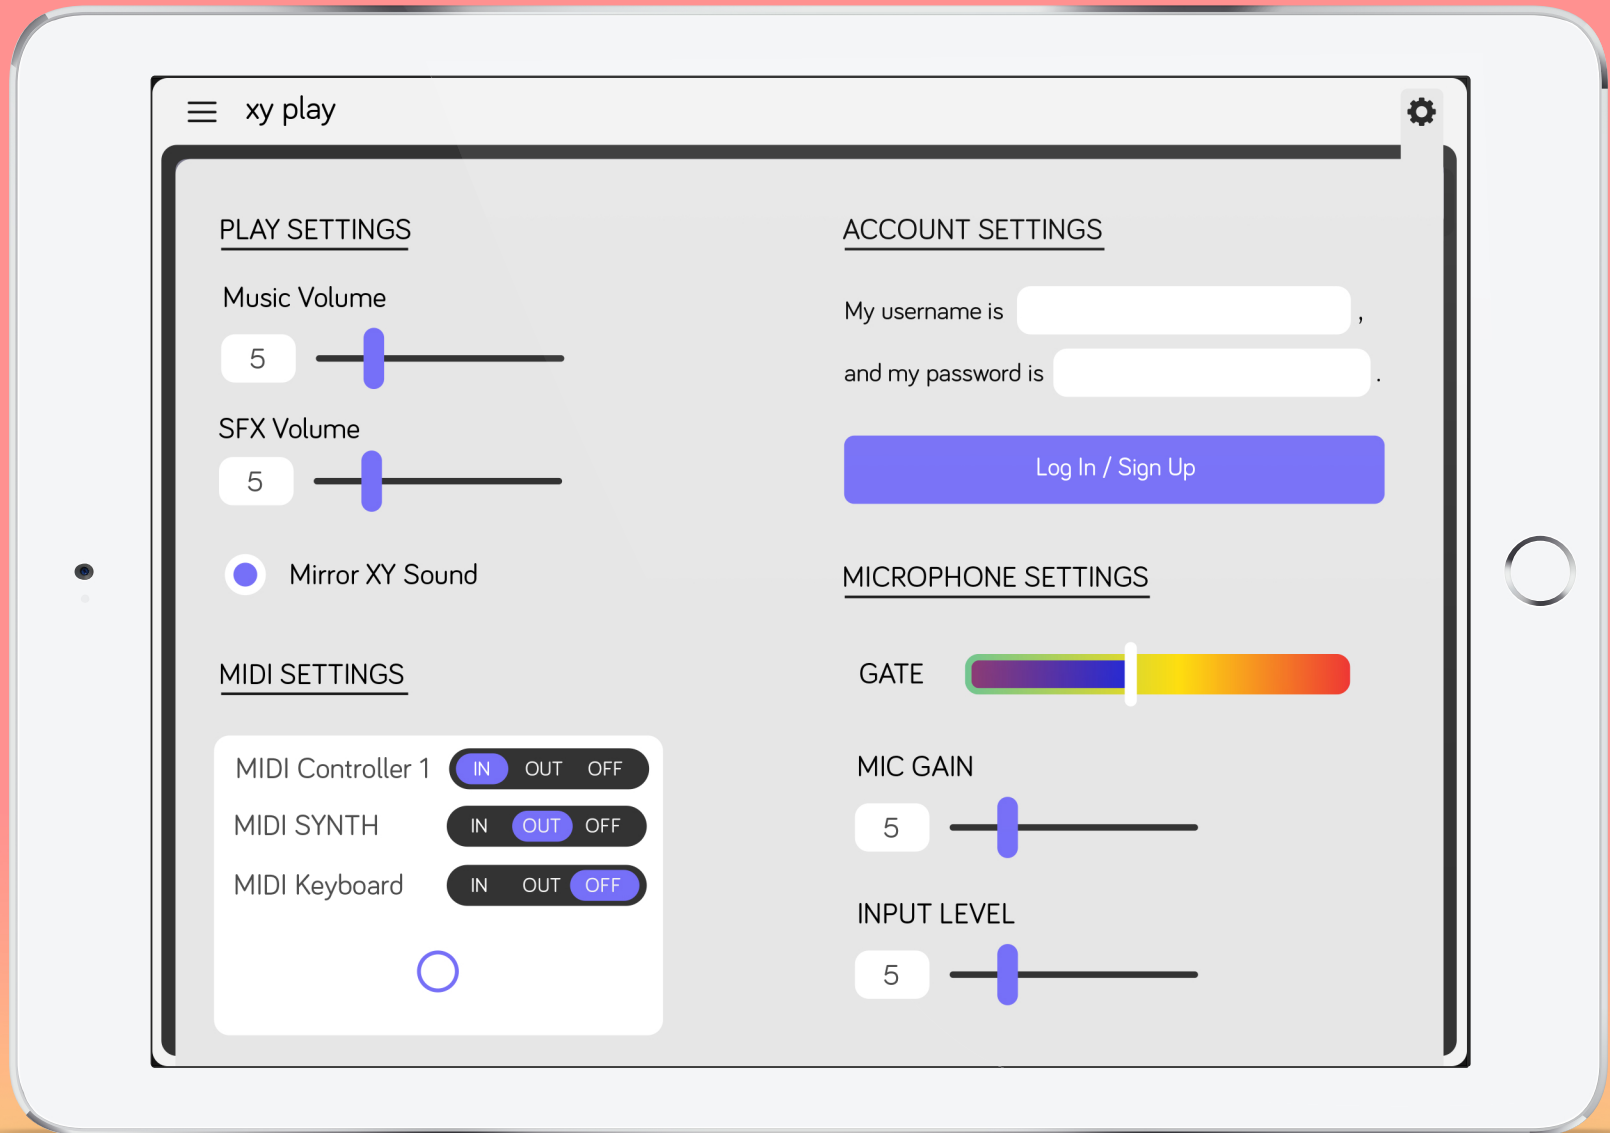

LEARN MENU

the learn menu, the second tab in the menu drop-down, gives access to lessons in music theory and technique

XY LEARN PAGE

the learn page uses walkthroughs, dialogues, and activities to teach music concepts

SETTINGS

provides input, control, audio, and gameplay settings
